- Panel Speakers for 15+ yrs
- Community Building Event Organizer
- Festival & Small Venue Organizer

ARTIST STATEMENT

Hi, I'm Tyger-B, a muralist who travels for a living, and I'm always excited to create works for the public to enjoy. Since my twelfth grade year, I've been creating large scale murals, and have now created murals throughout USA, Hong Kong, and Canada. After my most recent murals in Montreal and Memphis, I've been going throughout USA participating in festivals; and enjoying the community of art lovers in several countries. My choice of vibrant colors and playful themes are based on the communities in which the works were created. Adding the touch of spray paint with my airbrush methods, I've quickly adapted to pushing out my details in settings like small businesses, backyards, doorways, corporate events, and large scale public pieces; creating a touch of professionalism and street art for each occasion.

ABOUT MY WORK

My color palette aims to create a balance, an inviting atmosphere that appeals to viewers of all ages. It combines vibrant selections, with soft tones, and a blend of the surroundings. My floating orbs add an element of wonder and imagination, encouraging viewers to explore the depths of connection and community. My clouds are a way to suggests there's freedom beyond any limit, while aiming to have the viewers take in the calm space and spectrum of colors. My page flips/ "torn" frame design suggests there's always more than meets the eye, encouraging the viewers to explore the unknown. I aim to have my murals create an uplifting and inclusive atmosphere, inspiring individuals and families to dream big, and celebrate their journey in life.
